I declare, in signing the above North American Weed-Free Forage Inspection Request, I have read the requirements for Certification, and I will abide by the North American Weed-Free Forage Certification Standards. I also state that all equipment involved with mowing, baling, or other handling, will be adequately cleaned to maintain the weed-free status of the forage. The forage that is verified as eligible will be harvested on the field(s) described above. I will maintain identity of the forage from harvesting until it leaves my possession through the use of lot numbers or some type of identification. I will have a record of the number of bales or pounds/tons harvested, and such records are available to the certifying agency upon request.
